DETAILED ACTION

The preliminary amendment filed 11/30/03 cancelling claims 1-64 and adding claims 65-72 is acknowledged and has been entered. Claims 65-72 are pending in the case.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 65-72, drawn to a method for treating a lectin-mediated platelet disorder, classified in class 435, subclass 6.

Sequence Election Requirement Applicable to Group I

The Group detailed above reads on patentably distinct multiple SEQ ID Numbers. The sequences are patentably distinct because they are unrelated sequences, and a restriction is applied to the Group detailed above. The sequence searching in multiple expansive databases has put undue burden on the examiner and office resources. Applicants are required to elect a single nucleic acid sequence from within each claimed group of SEQ ID NOs (See MPEP 803.04).

MPEP 803.04 states:

Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq. Nevertheless, to further aid the biotechnology industry in protecting its intellectual property without creating an undue burden on the Office, the Commissioner has decided sua sponte to partially waive the requirements of 37 CFR 1.141 et seq. and permit a reasonable number of such nucleotide sequences to be claimed in a single application. See Examination of Patent Applications Containing Nucleotide Sequences, 1 192 O.G. 68 (November 19, 1996).

Therefore Applicant must elect a specific recognition sequence for examination. The applicant may elect:

- 1) a single SEQ ID NO selected from the group disclosed in claim 68, consisting of SEQ ID NO: 199-247 and 251-290; and
- 2) one SEQ ID NO selected from the group disclosed in claim 72, consisting of SEQ ID NO: 67-117, 129-196 and 293-388.

Applicant is advised that examination will be restricted to **only the elected sequence(s) and should not be construed as a species election**. Non-elected sequences and multiple sequence claims will be withdrawn from prosecution.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1637

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
